

Anurag Jain

Senior Software Engineer

Mr. Jain joined Sonoma Technology in 2022 and designs and develops innovative software and products for air quality measurements and monitoring projects.

Since joining the team, Mr. Jain has played a role in developing solutions for a range of projects such as the SoCalGas Aliso Canyon Benzene Monitoring Warning Subscription System. He is also involved with design and development of real-time data ingestion, analysis, and visualization systems. In this role, he leverages Sonoma Technology's domain expertise along with his core full-stack software design and development experience and skills to create cutting-edge cloud-native solutions for our clients.

Mr. Jain's software engineering career includes contributions to a cross-section of industries that include banking and real estate. Mr. Jain has over 10 years of experience leading and managing multiple, geographically dispersed Agile teams in both startup and large enterprise environments. He has worn multiple hats and has experience building high performing teams working on distributed, cloud-based and data analytics products/applications across a myriad of tools and technologies.
